Multi-Sector Webinar, Presented By

**National Laboratories:
More Than Meets the Eye!**

**Careers, Internships, Mentorships, Opportunities for
Community College Faculty & Students**

Friday, September 18, 2pm

Join Us:

<https://cccconfer.zoom.us/j/98642964897>

National Laboratories are premier players in federally-funded scientific research from cybersecurity to electric vehicle charging stations, as well as major regional employers. They also provide novel opportunities for funding and career path development, even at Community Colleges:

- Campus investments in energy efficient infrastructure and buildings
- DOE funding programs including prize competitions and challenges
- STEM efforts including internships, fellowships, and workforce development
- Entrepreneurship and start-up business mentoring or support.

Join our presenters Erick Hunt, Commercialization Executive, Department of Energy, Office of Technology Transitions; Noel Blackburn, Manager of University Relations and DOE Internship Programs for Brookhaven National Laboratory; and Bethany McCormick of Lawrence Livermore National Laboratory, Engineering Department as they describe unique opportunities for Community College faculty and students in the Advanced Manufacturing, Advanced Transportation & Logistics, Information & Communications Technology/Digital Media, and Energy, Construction, and Utilities Sectors.

Agenda

- DOE OTT Purpose, Mission, & Toolkit Overview
- National Laboratories - What They Do; Little Knowns and Underutilized Partnership Opportunities
- DOE and National Laboratories as Employers - Internships, Mentorships, Career Opportunities
- Q&A
